

Wedeven Wire

FIRST NEWSLETTER

Welcome to the *Wedeven Wire*, the brand new quarterly newsletter that will let you know what's happening at Wedeven Associates Inc. The *Wire* will discuss influential new projects the company is working on, and will also give a glimpse into the culture and community of Wedeven Associates Inc. Whether you are a potential customer interested in tribological engineering, or a longtime partner of Wedeven, this newsletter will help you stay informed. It also provides a way to get our name out, so if you know of anyone who might be interested in the newsletter, just contact us. We are always open to feedback or suggestions, so do not hesitate to contact us.

QUICK TAKES:

OSHA Safety Compliance

Wedeven Associates strives to stay current on all safety standards. Here are some of the recent upgrades we have made:

- Written OSHA compliance manual
- Safety and health policy
- Lock out/tag out procedures
- Chemical Hygiene Plan
- Reactive Chemical Storage
- Back injury prevention training
- Electrical safety training
- Monthly lab audits

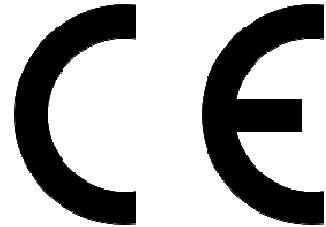

Permanent Section: WAM™ World

In each newsletter, this WAM™ World section will specifically talk about our WAM™ Machines (Wedeven Associates Machine).

CE Compliance

Wedeven Associates strives to accommodate a wide customer base, including our international clients. However our machines were formerly not CE compliant. We have recently updated our design to accommodate the CE standards so that our machines accommodate European regulations.

Wedeven Family:

Wedeven Associates specializes in solving problems associated with the "tribology" of mechanical systems. We conduct investigations, particularly specialized testing, into advanced lubricants and materials for the aerospace and automotive industries. We also specialize in extreme environment bearing systems like those found in jet engines, rocket engines and advanced transmissions. Visit our website at www.wedeven.com for more information.

For next issue: Wedeven Associates is currently working on a new machine along with new software. Read the next issue of the *Wedeven Wire* to find out more.
